

# Bentley Oakes

Assistant Professor

✉ Bentley.Oakes@polymtl.ca    📍 Montréal, Canada    🌐 bentleyoakes.com    📄 Google Scholar

🆔 0000-0001-7558-1434    🌐 bentley-oakes    📄 Bentley-Oakes

## Key Academic Skills

**Researcher:** Lead- and co-author of dozens of publications with hundreds of citations on Google Scholar.

**Collaborator:** Involved in multiple international academic and industrial collaborations.

**Teacher/Mentor:** Extensive experience teaching courses and mentoring graduate students.

**Community-Builder:** Organizing and program committee member for local and global events.

## Language Skills

**English:** Native proficiency

**French:** Intermediate

## Education

- |            |                                                                                                                                                                                                                                                                                                                                  |                              |

**University of Antwerp**, Post-Doctoral Researcher

- Labs: Antwerp Systems and Software Modelling, and Constrained Systems Lab
- Supervisors: Hans Vangheluwe and Joachim Denil
- Research topics: Verification and validation of cyber-physical systems, model-driven engineering, multi-paradigm modelling, co-simulation, and digital twins.

Antwerp, Belgium  
Sep. 2018 – Jul. 2021

**Université de Montréal**, Visiting Researcher

- Host: Eugene Syriani, GEODES Software Engineering Research Group
- Research topic: Developing an interface between the AToMPM modelling tool and the ModelVerse modelling repository.

Montréal, Canada  
May 2018

**fortiss GmbH**, Visiting Researcher

- Host: Levi Lúcio
- Research topic: Formalizing representations of model transformation languages.

Munich, Germany  
Jul. – Aug. 2016

**General Motors Technical Center**, Visiting Researcher

- Host: Ramesh Sethu
- Research topics: Applying model transformations for code/model modernization at an industrial scale, and industrial intellectual property concerns.

Warren, USA  
Oct. – Dec. 2014

## Industrial Collaborations

---

**Framework for Systematic Design of Digital Twins (DTDesign)**

2019–2021

- Collaborators: Atlas Copco, Flanders Make
- Topics: Digital twin characteristics, integrating knowledge graphs and digital twins.
- Funding: Flanders Innovation and Entrepreneurship Agency (VLAIO)

**Automated & Simulation-based Functional Safety Engineering Methodology (aSET)**

2018–2020

- Collaborators: Dana Belgium NV, Siemens Industry Software (Leuven), Flanders Make
- Topics: Verification of safety-critical cyber-physical systems (formal methods, reinforcement learning-based fault injection for hazard discovery, simulation/visualization), DevOps for functional safety.
- Funding: Flanders Innovation and Entrepreneurship Agency (VLAIO)

**Innovation in the Development of Electrical Systems For Aeronautics (INES)**

2019–2020

- Collaborators: Boeing Research & Technology Europe (Madrid), Siemens Industry Software (Leuven), Flanders Make
- Topics: Co-simulation configuration, fault injection in co-simulation.
- Funding: Flanders Innovation and Entrepreneurship Agency (VLAIO)

**Network for the Engineering of Complex Software-Intensive Systems for Automotive Systems (NECSIS)**

2013–2016

- Collaborators: General Motors of Canada Ltd., Queen's University, University of Antwerp
- Topic: Verification of model transformations.
- Funding: \$14M from Automotive Partnership Canada and Natural Sciences and Engineering Research Council of Canada (NSERC)

## Teaching Experience

---

**Polytechnique Montréal**, Course Instructor

Montréal, Canada  
Jan 2024 – present

- Engineering of Digital Twins (LOG8421E) — Winter 2025, Winter 2026
- Introduction à la programmation (INF1007) — Fall 2025, Fall 2026
- Software Quality Engineering (LOG8371E) — Fall 2024
- Scientific and Technical Communication (INF6900AE/INF7900A) — Winter 2024, Fall 2024, Fall 2025, Fall 2026

|                                                                                                                                                                                                                                                                                                                                                                                                                          |                                         |

- Ontological modelling of machine learning pipelines

## Invited Talks and Presentations

---

**Guest lecture — Engineering Digital Twins course, McMaster University**

Mar. 2026

- Host: Prof. Istvan David
- *What Does Your Digital Twin Do? A Framework and Tooling for Systematic DT Reporting*

**Invited talk — SIG LLODIA (Lecture #3)**

Jan. 2026

- *Towards Ontology-based Digital Twin Service Construction and Reporting*

**Guest lecture — RAISE course, UCLA**

Nov. 2025

- Host: Dr. Maged Elaasar
- *What is a ‘Digital Twin’ and How Do I Build One?*

**Tutorial — Software Engineering for Machine Learning Applications (SEMLA)**

Jun. 2025

- *What is a ‘Digital Twin’ and How Do I Build One?*

**Invited talk — EDT.Community**

May 2025

- *Systematic Digital Twin Reporting*
- [Video recording](#)

**Invited talk — Next-Generation Cities Institute, Concordia University**

May 2025

- *Accelerating Digital Twin Research and Engineering*

**Conference paper presentation — ICSE 2025, Ottawa**

May 2025

- *Building Domain-Specific Machine Learning Workflows: A Conceptual Framework for the State-of-the-Practice* (journal-first)

**Guest lecture — Engineering Digital Twins course, McMaster University**

Mar. 2025

- Host: Prof. Istvan David
- *Accelerating Digital Twin Research and Engineering*

**Research presentation — KARI Delegation, Polytechnique Montréal**

Feb. 2025

- Advanced Air Mobility (AAM) challenges and advancements

**Invited talk — Software Engineering at Montréal (SEMTL)**

Jan 2025

- *Recent Work on Systematic Reporting and Construction for Digital Twins*

**Guest lecture — LOG8704 XR Software Development, Polytechnique Montréal**

Nov. 2024

- *Digital Twins: Introductions and Intersections*

**Conference paper presentation — MODELS 2024**

Sep. 2024

- *Fault localization in DSLTrans model transformations by combining symbolic execution and spectrum-based analysis* (SoSyM journal-first)

**Invited talk — onto:Nexus Forum 2024**

Jan. 2024

- *Accelerating Digital Twin Construction with Ontologies*
- 1st International Forum on Ontological Modeling and Analysis, NASA JPL (attended online)

**Invited talk — Polytechnique Montréal**

Jan 2023

- *Bridging the Gap in Verification and Validation of Complex Systems*

|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Bridging the Semantic Web and Model-Based Systems Engineering with the Ontological Modeling Language</b><br>Maged Elaasar, <b>Bentley Oakes</b> , Eduard Kamburjan, Mohammad Hamdaqa, Abdelwahab Hamou-Lhadj<br>(International Semantic Web Conference (ISWC) — accepted)                                 | Oct. 2026 |
| <b>Involving before Evolving: A Vision for Trustworthy Enterprise Digital Twin Engineering</b><br>Kérian Fiter, Adil Lagrou, <b>Bentley Oakes</b> , Franck Dervault<br><a href="#">10.1145/3837062.3839094</a> (MODELS Companion (EDTconf))                                                                  | Oct. 2026 |
| <b>Model-based digital twin engineering: insights, challenges, and future directions</b><br>Philipp Zech, Souvik Barat, Benjamin Nast, <b>Bentley Oakes</b> , Judith Michael, Steffen Zschaler, Balbir Barn, Ruth Breu<br><a href="#">10.1007/s10270-026-01368-8</a> (Software and Systems Modeling (SoSyM)) | May 2026  |
| <b>Automated Extraction and Analysis of Developer’s Rationale in Open Source Software</b><br>Mouna Dhaouadi, <b>Bentley Oakes</b> , Michalis Famelis<br><a href="#">10.1145/3729383</a> (Proceedings of the ACM on Software Engineering (FSE))                                                               | Jan 2025  |
| <b>DTInsight: A Tool for Explicit, Interactive, and Continuous Digital Twin Reporting</b><br>Kérian Fiter, Louis Malassigné-Onfroy, <b>Bentley Oakes</b><br><a href="#">10.1109/MODELS-C68889.2025.00030</a> (MODELS Companion (MODELS-C))                                                                   | Jan 2025  |

|                                                                                                                                                                                                                                                                                                    |           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Building Domain-Specific Machine Learning Workflows: A Conceptual Framework for the State of the Practice</b><br><b>Bentley Oakes</b> , Michalis Famelis, Houari Sahraoui<br><a href="#">10.1145/3638243</a> (ACM Transactions on Software Engineering and Methodology (TOSEM))                 | Apr. 2024 |
| <b>Toward Intelligent Generation of Tailored Graphical Concrete Syntax</b><br>Meriem Ben Chaaben, Oussama Ben Sghaier, Mouna Dhaouadi, Nafisa Elrasheed, Ikram Darif, Imen Jaoua, <b>Bentley Oakes</b> , Eugene Syriani, Mohammad Hamdaqa<br><a href="#">10.1145/3640310.3674085</a> (MODELS 2024) | Jan 2024  |
| <b>Towards Ontological Service-Driven Engineering of Digital Twins</b><br><b>Bentley Oakes</b> , Claudio Gomes, Eduard Kamburjan, Giuseppe Abbiati, Elif Ecem Bas, Sebastian Engelsgaard<br><a href="#">10.1145/3652620.3688261</a> (MODELS Companion (EDTconf) — Best Short Paper Award)          | Jan 2024  |
| <b>Toward a Systematic Reporting Framework for Digital Twins: A Cooperative Robotics Case Study</b><br>Santiago Gil, <b>Bentley Oakes</b> , Cláudio Gomes, Mirgita Frasheri, Peter G. Larsen<br><a href="#">10.1177/00375497241261406</a> (SIMULATION)                                             | Jan 2024  |
| <b>openCAESAR: Balancing Agility and Rigor in Model-Based Systems Engineering</b><br>Maged Elaasar, Nicolas Rouquette, David Wagner, <b>Bentley Oakes</b> , Abdelwahab Hamou-Lhadj, Mohammad Hamdaqa<br><a href="#">10.1109/MODELS-C59198.2023.00051</a> (MODELS Companion (MODELS-C))             | Jan 2023  |
| <b>Machine Learning-Based Fault Injection for Hazard Analysis and Risk Assessment</b><br><b>Bentley Oakes</b> , Mehrdad Moradi, Simon Van Mierlo, Hans Vangheluwe, Joachim Denil<br><a href="#">10.1007/978-3-030-83903-1_12</a> (SAFECOMP 2021 (Computer Safety, Reliability, and Security))      | Jan 2021  |

## Publications
